

### Capacitive Touch Board for Interactive Applications

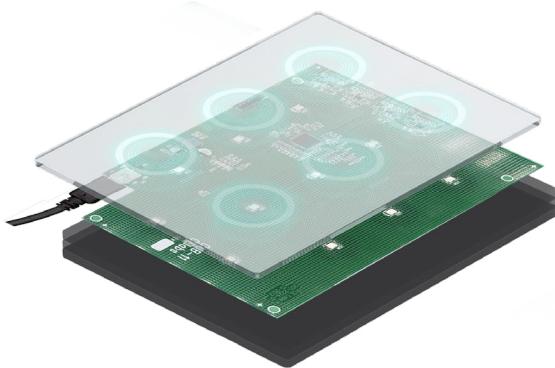

## PRODUCT OVERVIEW

The CE-CTB11 capacitive touch button board is a USB-connected control panel with 11 programmable touch buttons that add reliable, tactile less interaction to CE Labs digital signage deployments. Each button includes integrated LED feedback, and the board connects directly to CE Labs media players via USB for seamless integration.

Using CE Labs configuration tools, the CE-CTB11 can trigger content, commands, and interactive workflows—ideal for kiosks, menu boards, exhibits, and other hands-on customer experiences.

## System Application:

Engineered for integration within display fixtures. Validate custom applications prior to full-scale deployment.

### Features:

- Content Playback Triggers
- USB-connected to CE Labs media players
- Built for customized overlay displays

### Specs:

- 11 Programmable Capacitive Touch
- Triggers action through interaction
- 1/4" or thinner overlay material

### Dimensions/Weight:

- (W)6.0" x (D)4.0" x (H)0.44"
- 1.76 OZ.
- Custom programmed LED colors

### Programmable Button Actions:

- Play
- Next/ Previous
- Volume Up/ Down
