Integrate Push Buttons with a CE LABS CE440 Media Players

PRODUCT OVERVIEW

The CE-RPB4 is an GPIO adapter Pheonix to RJ9. This allows four push-buttons to interface directly with CE Labs GPIO supported media player device. Please visit our website at celabs.com.

Using CE Scripts enables button assignments to perform programmable actions on the media player.
(example: Start/Stop/Switch/Scale video and audio tracks, with blinking LED's
