

2.4/5G High Gain External Omnidirectional Antenna

PRODUCT OVERVIEW

High-quality, single-band rubber duck antenna with 3 dBi nominal gain, optimized for 2.4/5 GHz operation. This omnidirectional tilt/swivel blade antenna measures 5.46 inches in height and 0.39 inches in width, providing a compact profile for a wide range of wireless applications. The SMA male connector and 2:1 input VSWR support efficient power transfer and reliable performance, while its linear polarization and -40 °C to 60 °C operating temperature range make it suitable for demanding indoor and outdoor environments.

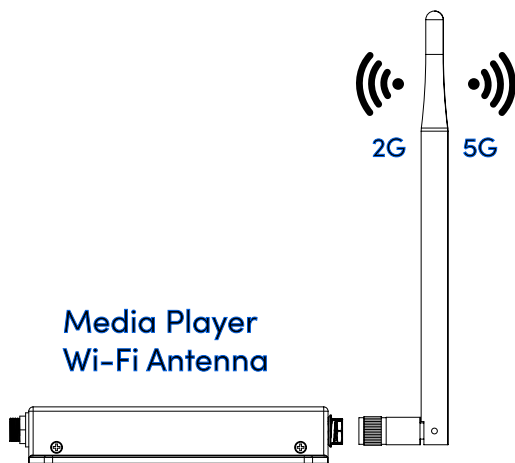

Features:

- Dual-Band 5dBi Wi-Fi Antenna
- 2.4 GHz to 5 GHz
- Omnidirectional with Tilt/Swivel

Specs:

- Min/Max Frequency 2.4/5 GHz
- 5 dBi Gain
- SMA Female Connector
- Tilt/swivel 5.46" tall
